Ms. Somia Aluwalia
New Jersey Department of Health and Senior Services
Hazardous Health Site Evaluation Program
3635 Quakerbridge Road
Mercerville, New Jersey 08619

Dear Somia:

Enclosed is the analytical data for the soil samples collected at the Matteo Iron and Metal Site (Willow Woods Mobile Home Community) during the week of February 6, 2006. All of the analytical data presented in this package was generated from samples collected from the 0-3 inch depth interval. Also attached as a guide are copies of a draft map that depicts the sample locations as they were recorded by GPS. As soon as I review the map and have it finalized, I will send you a full-scale copy of it.

The samples were analyzed by the EPA laboratory in Edison, New Jersey. Please note that according to laboratory protocol, all data is reported to two significant figures.

If you have any questions concerning the data or the sample locations I can be reached at 732.906.6930.

Sincerely,

Nick Magriples, On-Scene Coordinator
Removal Action Branch
